Re: Water Conservation Stage 1 Termination

Dear Customers:

The San Simeon Water Conservation Plans allows for the Stage One requirements to be lifted once the Pico Creek begins running to the ocean "and" water levels in the District's wells begin a steady rise. I am happy to inform you that both of these requirements have been met and effective immediately Stage One water conservation measures are terminated.

As everyone is aware, water is a valuable resource to our community. Even though water use restrictions have been lifted, please continue to conserve wherever possible and to use water in a responsible manner.
